PROFESSIONAL SUMMARY

Backend Engineer with 2+ years of experience building scalable FinTech applications using Node.js, Express.js, MongoDB, Redis, and RabbitMQ, with additional working knowledge of Java and Spring Boot. Built 50+ REST APIs, integrated 20+ third-party services, and improved performance by 35% through caching and database optimization.

PROFESSIONAL EXPERIENCE

Software Engineer — Rapipay Fintech Pvt. Ltd.

Aug 2024 – Present

- Frontend Development:** Developed UI for internal IT portals and a video conferencing platform using React.js, Tailwind CSS, and Material UI, improving usability and issue resolution efficiency.
- Built and enhanced user interfaces for real-time communication systems using Jitsi React SDK, enabling seamless interaction between agents, merchants, and moderators.
- Backend Development:** Developed and maintained 50+ REST APIs serving merchant onboarding, KYC verification, and transaction workflows used across multiple FinTech products.
- Improved performance by 35% using MongoDB indexing and Redis caching.
- Designed RabbitMQ-based asynchronous workflows and scheduler-driven background jobs, improving system reliability and reducing API response latency for long-running operations.
- Integrated DigiLocker, Digitap, and eSign services, automating PAN/Aadhaar verification and reducing manual verification effort.
- Ensured security and data integrity through validation, rate limiting, and structured error handling.
- Tools & Collaboration:** Worked with Jira, Confluence, and Bitbucket in an Agile development environment.

PROJECTS

Employee Productivity App

May 2026

- Designed Node.js and MongoDB-based onboarding workflows supporting lead assignment, QR activation, Udyam verification, and merchant lifecycle management.
- Developed RESTful APIs for onboarding lifecycle, including lead assignment, tracking, and workflow transitions.
- Implemented business features such as QR activation, Udyam registration, and trigger-based email notifications for overdue merchants.
- Implemented Redis caching, MongoDB indexing, and RabbitMQ-based asynchronous processing to improve system throughput and reliability.

Merchant Onboarding

March 2026

- Built a FinTech onboarding platform for agent and merchant lifecycle management with end-to-end KYC workflows.
- Developed RESTful APIs to manage onboarding journeys, verification status tracking, and secure data processing.
- Integrated DigiLocker, penny drop, face liveness, photo capture, and eSign for secure identity verification.
- Handled asynchronous verification flows to ensure reliable processing across external service providers.

Complaint Management Portal

Jan 2026

- Designed and developed backend system for handling transaction failures, fraud cases, and refund disputes in a FinTech environment.
- Built RESTful APIs for complaint creation, multi-RRN mapping, status tracking, and workflow orchestration.
- Implemented multi-team workflow enabling case assignment, document upload, and resolution tracking.
- Designed lifecycle management including case creation, verification, resolution, and reopening workflows.
- Optimized performance using Redis caching and ensured data integrity with validation, RBAC, and error handling.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Java, Python

Backend Frameworks: Node.js, Express.js, Spring Boot, Hibernate/JPA

Frontend: React.js, Tailwind CSS

Databases, Storage & Caching: MongoDB, SQL, Parquet, Redis

Tools/Platforms: Git, Bitbucket, GitLab, Maven, Postman, VS Code

Concepts & Messaging: Data Structures and Algorithms, OOP, Microservices Architecture, System Design, Operating Systems, RESTful APIs, RabbitMQ, JUnit

AI Tools: ChatGPT, Claude, Codex, GitHub Copilot, Cursor, Gemini, Antigravity

EDUCATION

KIET Group of Institutions, Delhi-NCR

Nov 2021 – June 2025

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence)

AKTU — CGPA: 8.5

Jawahar Navodaya Vidyalaya, Latehar, Jharkhand

April 2020 – July 2021

Intermediate (CBSE)

Score: 92.2%
